

4 STEPS FOR DONATING COMPOUNDED HAND SANITIZER TO FIRST RESPONDERS

1. Compound the hand sanitizer.

Download our [WHO-based formulas](#) and order the necessary ingredients, then compound the hand sanitizer in individual bottles.

2. Contact your local first responders.

Reach out to police and fire departments and hospitals to set up a time to deliver free hand sanitizer. Mention that you would like to take photos or video at time of delivery.

3. Hand off the hand sanitizer.

Take plenty of photos and/or video of the #CompoundingHandoff from your team to officials at all locations.

4. Post on social media.

Use [our template](#) to create a social media caption, and post it along with photos and/or video on all of your social media channels. Be sure to include #compoundinghandoff and tag @pccarx in your caption!

PRO TIP: Tag the recipients' profiles/pages when possible, and use #handsanitizer and #[YOURCITYNAME] to increase your reach.
